IPAQ C202 is a digital, easy-to-use temperature transmitter developed specifically for measurements with Pt100 sensors. Its robust design and high quality gives excellent performance and accuracy also under harsh conditions. The IPAQ C202 is also available with ATEX and IECEx certificates making it suitable for a wide range of applications.

With the new runtime counter function you can easily supervise the elapsed operational time between calibrations.

**Measurements with Pt100 sensors in 3-wire connection**
IPAQ C202 accepts inputs from Pt100 sensors in 3-wire connection: Pt100 acc. to IEC 60751 (α=0.00385)

**Runtime counter**
With the runtime counter function you can for example easily supervise the elapsed operational time.

**Temperature linear output**
Fully temperature linear 4-20 mA output.

**High accuracy**
With an accuracy of ±0.1 °C / ±0.2 °F or ±0.1 % of span [the largest apply] C202 offers an outstanding performance in its class.

**Sensor matching for maximum accuracy**
A matching to a calibrated temperature sensor can easily be performed by entering the sensor errors in the low and high ends of the measuring range.

**Designed for harsh conditions**
Rugged design tested for 10 g vibrations.

**Mounting, wiring and testing**
C202 is designed to fit inside connection heads type DIN B or larger.
The large centre hole, dia. 7 mm / 0.28 inch, the robust terminals with test connections and the low height greatly simplify the mounting, wiring and testing procedure.

**Configuration without external power**
Edit or read the configuration off-line, i.e. without power supply, by just connecting the USB-interface to a PC.

**ConSoft, easy-to-use Windows configuration software**
The simple and user friendly software, ConSoft, is used for transmitter configuration in seconds. In one window all parameters are set, such as measuring range, sensor failure action, error corrections etc.
